

## ÜLock I/O Module

Module for installation in a standard flush-mounted box for controlling the ÜLock by on-site systems using a potential-free contact.

Short-term and permanent unlocking are optional. Very easy coupling with the ÜLock with the help of the programming button in the lock. Additional readers can be programmed optionally.

Including feedback "battery low".

Connection voltage: 12V DC – 24V DC

Approximate dimensions: 46 x 46 x 20 mm

Item number: 77.10.0110
